CURRENT LIST of MEDICAL LITERATURE

514
515

Vol. 5 October 5, 1943 No.13/14

SUBJECT GROUPS ACCORDING TO JOURNALS

1. Anatomy; Histology
2. Anthropology; Ethnology
3. Archeology; Paleontology
4. Aviation Medicine
5. Bacteriology; Parasitology
6. Biology; Embryology
7. Bone; Joint; Extremities; Muscle
8. Cancerology
9. Cardiovascular System
10. Chemistry; Physics
11. Dentistry; Stomatology
12. Dermatology
13. Diagnosis; Clinical Methods
14. Dietetics; Foods; Nutrition
15. Digestive System
16. Endocrinology
17. Forensic Medicine; Toxicology
18. Genetics; Eugenics
19. Gynecology; Obstetrics
20. Hematology
21. History; Biography; Bibliography
22. Homeopathy; Osteopathy, etc.
23. Hospitals
24. Immunology; Serology
25. Industrial Hygiene; Sociology
26. Infectious Diseases; Epidemiology
27. Medicine
28. Metabolism
29. Military and Naval Medicine
30. Miscellaneous
31. Neurology; Psychiatry
32. Nursing
33. Ophthalmology
34. Otorhinolaryngology; Phoniatry
35. Pathology
36. Pediatrics; Child Welfare
37. Pharmacology; Pharmacy
38. Physiology
39. Psychology; Mental Hygiene
40. Public Health; Sanitation
41. Radiology; Phototherapy
42. Respiratory System
43. Surgery; Traumatology
44. Therapeutics
45. Tropical Medicine
46. Tuberculosis
47. Urology
48. Venereal Diseases; Sexology
49. Veterinary Medicine
50. Zoology

Privately published under the auspices of the

MEDICAL LIBRARY ASSOCIATION, INC.
AND THE
FRIENDS OF THE ARMY MEDICAL LIBRARY
Washington, D. C.

Printed in the U.S.A.

JOINT AUTHORSHIP

Joint aurhorship presents problems to which there is no satisfactory solution, and they begin when the joint authors plan the title page of their book, if not before. Even if one of them is senior author and has done a preponderance of the work, so that he would be justified in subordinating the other or others under some phrase as "with the assistance of" or "with the collaboration of," he may feel that it would be ungracious to do so, and may insist on an alphabetical listing of the authors without distinguishing phrases, even if his own name comes second or last in such an order. On the other hand there is the ungracious senior author who ostensibly lends the prestige of his name to a junior author or authors; but, by putting his own name first (as of course he must if the loan of his name is to carry full value!), robs the junior author or authors of the credit that is due them for having done all or most of the work. Or suppose that two authors have shared the work equally and wish to indicate that fact by coordinating their names on the title page; the effort is fruitless, since one name must come first and the other second in the left-to-right order as inexorably as in the top-to-bottom order; for collaboration is a logical relation which is incapable of typographic representation. And when the book is entered in library card catalogs, a seemingly gratuitous insult is added to an obviously inevitable injury by treating the first-named as author (printed in black face) and the second-named as joint author (typewritten as an after-thought). The only equitable remedy -- a unit card for each collaborator -- would violate all the conventions of cataloging, and is uneconomical and impracticable. The moral for authors would seem to be the Irish one: collaborate only with authors whose names come farther on in the alphabet.

Max H. Fisch

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is $5.00 per year in the United States and $5.50 per year in other countries. The Recent Book Acquisition may be obtained separately at $1.00 per year. Address communications to:
Medicofilm Service
